AI READINESS ASSESSMENT

Department Manager Discovery Questionnaire

Prepared by Kemper Design Services | Worx1 HR | April 2026

This questionnaire helps Kemper Design Services understand how your department currently operates and where AI, automation, or workflow modernization may deliver the most meaningful improvements. There are no right or wrong answers. Be as candid and specific as possible — the more detail you provide, the more useful our recommendations will be.

Estimated completion time: 30–45 minutes. You may complete this before or during your discovery session.

Session Information

Respondent Name	
Job Title / Role	
Department	
Location (City / Office)	
Date Completed	
Discovery Session Date	

1. Department Overview

What is the primary function or mission of your department?

Which service lines does your team directly support? (e.g., recruitment, HR outsourcing, virtual assistants, client management, operations, compliance)

How long have current workflows and systems been in place? Have there been any major process changes in the past 12–18 months?

2. Roles & Team Structure

List the key roles within your department and a brief summary of their primary responsibilities.

Role / Title	Headcount	Primary Responsibilities

Are any roles primarily offshore (Colombia) vs. onshore (USA)? How does that split affect day-to-day coordination?

3. Core Systems & Tools

List every system, platform, or tool your team uses regularly — including HR systems, ATS, CRM, communication tools, project trackers, spreadsheets, and shared drives.

System / Tool Name	Primary Function	Department(s) Using	Integration with Other Tools?

Which systems are most critical to daily operations? Which would cause the most disruption if unavailable for a day?

Are there any systems your team has outgrown, workarounds you rely on heavily, or tools that don't communicate with each other well?

How is candidate and client data currently stored and accessed? Is there a single source of truth, or is data scattered across multiple tools?

4. Daily & Weekly Tasks

List the recurring tasks your team performs. Check the frequency and estimate hours spent per week.

Task / Process	Daily	Weekly	Monthly	Est. Hours/Week
	☐	☐	☐	
	☐	☐	☐	
	☐	☐	☐	
	☐	☐	☐	
	☐	☐	☐	
	☐	☐	☐	
	☐	☐	☐	
	☐	☐	☐	
	☐	☐	☐	
	☐	☐	☐	

Which tasks require the most back-and-forth communication (internally or with clients/candidates) to complete?

Are there tasks that are performed differently by different team members, with no standardized process? Describe.

5. Time Consumption & Volume

Roughly what percentage of your team's time is spent on administrative or coordination tasks vs. direct client or candidate-facing work?

Volume of job requisitions opened per week	**Average number of active candidates in pipeline**
Number of active clients managed by department	**Average time-to-fill a position (days)**
New hires onboarded per month	**Client status reports produced per week/month**

At what points in the month or quarter does workload spike significantly? What drives those spikes?

Are there tasks that consume disproportionate staff time relative to their business value? What are they?

6. Pain Points & Error Sources

Rate the severity of the following pain points in your department. (1 = Not a problem, 5 = Major ongoing issue)

Process / Task Area	1	2	3	4	5
Duplicate data entry across systems	☐	☐	☐	☐	☐
Manual resume screening and candidate filtering	☐	☐	☐	☐	☐
Scheduling delays (interviews, meetings, check-ins)	☐	☐	☐	☐	☐
Inconsistent onboarding documentation or process	☐	☐	☐	☐	☐

Slow client communication or status updates	☐	☐	☐	☐	☐
Tracking compliance requirements (I-9, background checks, etc.)	☐	☐	☐	☐	☐
Difficulty generating reports or pulling metrics	☐	☐	☐	☐	☐
Errors from manual handoffs between team members	☐	☐	☐	☐	☐
Finding or sharing candidate/client documents	☐	☐	☐	☐	☐
Training new staff on tools and processes	☐	☐	☐	☐	☐

Where do errors, miscommunications, or dropped tasks most commonly occur? Walk us through a recent example.

Are there compliance or legal requirements that create manual overhead? How are they currently tracked?

7. Automation Candidates

Review the tasks below. Fill in volume, manual effort, whether structured data exists, and your sense of priority for automation. Add rows for any additional processes not listed.

Process / Task	Volume (Daily/Wk)	Manual Effort (Hrs)	Data Available?	Priority (H/M/L)
Resume screening & shortlisting				
Interview scheduling / coordination				
Candidate onboarding document collection				
Client status updates & check-ins				
Timesheet collection & approval routing				
Compliance / I-9 / background check tracking				

Job posting creation & distribution				
Payroll data entry or reconciliation				
Internal reporting & KPI dashboards				
(Add your own)				

Are there any tasks your team currently does manually that you believe could be handled by a rule-based system, template, or AI tool today?

Have any automation attempts been made before (in-house or with a vendor)? What worked, what didn't?

Are staff open to using AI-assisted tools, or is there resistance? Describe the general attitude toward technology change.

8. Dependencies & Approval Workflows

Which tasks require approval from someone outside your department before they can proceed? List the task and who must approve.

Are there handoffs between your department and others (operations, finance, legal, client services) that cause delays or inconsistencies? Describe.

Who has authority to approve new tools, process changes, or automation implementations in your department?

Are there client-driven workflows — processes dictated by the client's own systems or preferences — that limit how you can standardize your side?

9. Metrics & Reporting

What key performance indicators (KPIs) does your department currently track? (e.g., time-to-fill, placement rate, client retention, cost per hire)

How are those metrics currently collected and reported? Is the process manual, automated, or a mix?

Are there metrics you know you should be tracking but currently are not? What prevents you from tracking them?

Who receives reporting from your department, and how often? (e.g., executive team, clients, operations)

10. AI & Technology Readiness

Rate your department's current readiness in the following areas. (1 = Not ready, 5 = Fully capable)

Process / Task Area	1	2	3	4	5
Data quality and consistency across systems	☐	☐	☐	☐	☐
Staff comfort level with digital tools	☐	☐	☐	☐	☐
Documented, repeatable processes (SOPs in place)	☐	☐	☐	☐	☐
Leadership support for technology investment	☐	☐	☐	☐	☐
Ability to measure impact of process changes	☐	☐	☐	☐	☐
Experience with any AI or automation tools to date	☐	☐	☐	☐	☐

Has your leadership team defined any AI or automation goals for the next 12 months? What are they?

What outcome would make this engagement a clear success for your department? Be specific.

11. Additional Notes

Use this space for anything you want to share that the questions above didn't fully capture — context about your team, constraints, recent changes, or priorities.

Thank you for your time.

Your responses will be reviewed before our discovery session and treated as confidential.
