Workflow & Automation Discovery

Worx1 HR & Outsourcing Solutions

Prepared by Kemper Design Services — April 2026

Purpose

This intake form is used by Kemper Design Services to document your current operational workflows, identify manual and repetitive tasks, surface automation candidates, and prioritize improvement opportunities. Please complete one form per department or functional area. All responses are confidential and used solely for the purpose of this engagement.

1. Engagement Context

Date Completed *MM / DD / YYYY*	
Department / Function *e.g., Recruiting, Onboarding, Accounting, Virtual Assistants*	
Primary Contact Name	
Title / Role	
Email	
Interview Format *In-person / Video call / Written / Workshop*	
Interviewer (KDS)	

2. Department Overview

Department Mission *What is the primary purpose of this department?*	
Team Size *Total headcount (US + Colombia)*	
US Headcount	
Colombia Headcount	

Remote / Hybrid Split *% fully remote, hybrid, in-office*	
Reporting Structure *Who does this department report to?*	
Primary Clients Served *Internal departments, specific client segments, or all clients*	
Peak Periods *When is workload highest? (e.g., month-end, Q1 hiring season)*	

3. Roles & Staffing

List all roles within this department. Add rows as needed.

Role / Title	Headcount	Location (US/CO/Remote)	Primary Responsibilities

Follow-Up Questions

Are any roles split across multiple functions or clients?	
Do staff frequently cover tasks outside their defined role?	
Are there staffing gaps or roles that are difficult to fill?	

4. Core Systems & Tools

List all software, platforms, and tools used in this department.

System / Tool Name	Category	Used By (Role/Dept)	Integration Points	Pain Points

System Follow-Up

Are there systems used by only 1–2 people?	
Are any tools duplicated in function? (e.g., two CRMs)	
Are there manual steps between systems (copy/paste, re-entry)?	
Is data exported regularly to spreadsheets? *Describe format and frequency*	
Are there tools that staff avoid or find frustrating?	

5. Daily & Weekly Tasks

Capture the key recurring tasks for this department. Include tasks that are manual, repetitive, or time-consuming.

Task / Process	Frequency	Avg. Time Spent	System(s) Used	Done By

Task / Process	Frequency	Avg. Time Spent	System(s) Used	Done By

Task Follow-Up

Which 3 tasks consume the most staff time?	
Which tasks are most prone to errors or rework?	
Are any tasks done only because a system does not support them natively?	
What happens when a key person is out — does work stop?	

6. Pain Points & Error Sources

Identify recurring friction, errors, delays, and frustrations. Be specific about impact.

Pain Point / Friction Area	Frequency / Severity	Downstream Impact	Current Workaround

Pain Point Follow-Up

What is the single biggest operational bottleneck right now?	
What do new hires consistently struggle with?	
What would staff fix first if they had time and budget?	
Are there tasks that clients complain about or notice?	

7. Automation Candidates

Identify specific tasks or processes that may be candidates for automation, AI assistance, or workflow improvement. Complexity: L = Low, M = Medium, H = High. Priority: L = Nice to have, M = Important, H = Critical.

Process / Task	Volume (per week)	Est. Time Saved	Complexity (L/M/H)	Priority (L/M/H)

Automation Follow-Up

Are there approval-gated tasks that could be partially automated?	
Are there recurring notifications, reminders, or follow-ups sent manually?	
Is document generation (offers, contracts, onboarding packets) manual?	
Are reports or dashboards built manually from raw data?	
Are there tasks staff have already tried to semi-automate (e.g., macros)?	

8. Handoffs, Dependencies & Approvals

Map how work moves into and out of this department. Note where delays or miscommunications occur.

Process / Handoff	Hands Off To	Approval Required?	Bottleneck / Delay Notes

Process / Handoff	Hands Off To	Approval Required?	Bottleneck / Delay Notes

Handoff Follow-Up

Are handoffs tracked in a system or communicated informally (email/Slack/verbal)?	
Where do tasks most often stall waiting for approval or input?	
Are there SLAs or response time expectations for handoffs?	
Do handoffs between US and Colombia teams create friction?	

9. Metrics & Reporting

Identify how performance is measured and where reporting gaps exist.

Metric / KPI	How It Is Tracked	Reporting Frequency	Current Gaps or Issues

Metrics Follow-Up

Are metrics reviewed regularly in team meetings?	
Are there KPIs the team tracks informally but cannot report on formally?	

Who requests reports and what decisions are made from them?	
How long does it take to produce a typical report?	

10. Open Notes & Observations

Additional context not captured above	
Interviewer observations *Patterns, surprises, red flags noticed during session*	
Follow-up items / open questions	
Recommended next steps *e.g., process mapping session, system demo, stakeholder review*	

Thank you for your time. Kemper Design Services will synthesize these responses into a prioritized opportunity map and share findings prior to the next engagement milestone.
